

Harnesses

the complete Tractel® harness line

TRIED, TESTED, TRACTEL®

www.tractel.com

donning the vest style harness

1 Unfasten leg and chest straps, hold harness by the dorsal D-ring and inspect before use.

2 Put harness on like a jacket with dorsal D-ring between shoulder blades.

3 Connect leg straps and adjust.

4 Connect chest strap and adjust so it is positioned across the chest.

5 Adjust shoulder straps and sub-pelvic strap so it is under the pelvis.

6 The harness should be snug but not overly tight.

7 Secure all loose ends of the webbing using the elastic keepers. The harness must allow movements and positions without significant constraints of the body.

User must read, understand and follow manufacturer's instruction before use. Failure to observe warning may cause falls which may result in serious injury or death. Images are for illustrative purposes only. Options and types of buckles may differ depending on model.

tower tracx harness

PROFESSIONAL SERIES

FEATURES

- Provides comfort and minimizes weight on shoulders
- Safe and secure
- Work-positioning side D-rings
- Fixed chest strap with front D-ring
- Visual fall indicator
- tracx pad evenly distributes the load to reduce worker fatigue
- Lumbar support with a removable belt
- Optional removable seat

FTD13L

- Tongue and buckle legs
- tracx pad
- Padded back support belt with side-positioning D-rings
- Sternal D-ring
- Fixed chest strap
- Removable tool belt accommodates pouches
- Dorsal D-ring
- Sizes: small, medium, large, X-large and XX-large

FTD13L/SAD

- Same as FTD13L with pro-seat saddle

XSAD1

- pro-seat saddle for harness
- Wrap around comfort pad
- Internal aluminum stay
- Adjustable height for correct fit
- Extended positioning D-ring

VISUAL FALL INDICATOR
(on back)

elaspac
 Replaces conventional stretch webbing with a controlled mechanical pack that limits the harness stretch to a maximum of 2 in. (5 cm) allowing a worker full mobility and freedom of movement while reducing excessive fall distances.

FMT95L

- elaspac
- Auto-buckle leg straps
- Auto-buckle chest strap
- Adjustable chest Strap
- tracx pad
- Belt
- Suspension loop
- Side-positioning D-rings
- Leg pads
- Removable tool belt
- Independent seat support
- Sizes: small, medium, large, X-large and XX-large

SUSPENSION LOOP
 To support worker weight while waiting for rescue.

kevlar® harness

PROFESSIONAL SERIES

ACK04

- Fire retardant materials
- Five-point adjustment
- Quick-connect legs
- Impact reduction fold
- Adjustable dorsal D-ring
- Adjustable chest strap
- Sewn sub-pelvic strap
- Inspection tag / serial number
- Kevlar® thread for durability
- Side-positioning D-rings
- Sizes: one-size and X-large

the safety harness with superior fit for all day comfort and quick intervention!

FUY119L

- Y-style keeping shoulder straps in place
- Waist D-ring for rescue attachment and controlled descent
- Independent leg/seat support
- traxx comfort pad
- Comfort waist lumbar support
- Six-point adjustment
- Size: Medium, large, X-large and XX-large

BENEFITS

- Simplifies rescue attachment
- Keeps work-position centered
- Unrestricted leg movement
- Increased mobility

APPLICATIONS

- Fall arrest
- Ladder climbing
- Work positioning
- Descent
- Rescue
- Rope access
- Rigging
- Tower climbing
- Wind

track harness

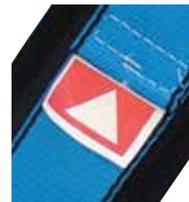

features

COMFORT SERIES

track PAD

Provides extra comfort and minimizes weight on shoulders. Keeps you dry and comfortable with breathable lining.

ADJUSTABLE DORSAL D-RING (hidden)

VISUAL FALL INDICATOR
(on back)

CHEST STRAP KEEPER

To keep the chest strap in place. Designed with additional friction preventing chest strap from sliding.

LABEL COVER

Protects labels containing important product information.

SPRING-LOADED ADJUSTER BUCKLE

Adjusts and stays in place. Prevents webbing creeping.

BELT LOOP

To accommodate any Tractel® removable belt or your favorite tool belt up to 4 in. (10 cm) wide.

SIDE-POSITIONING D-RINGS

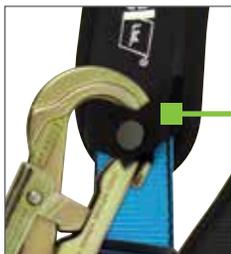

For work-positioning applications.

WAIST PAD

TONGUE AND BUCKLE

Quick-connect connection also available.

Tractel®S EXCLUSIVE DUAL KEEPER SYSTEM

LANYARD KEEPER

Snap release design to keep the lanyard arm out of the way when not in use and minimizing risk of tripping.

ELASTIC KEEPER

Allows excess webbing to be folded and tucked into the keeper to prevent from getting tangled.

RUBBER SLIDER

Prevents from creeping and losing adjustment.
